

IRB Approved at
the Study Level
Mar 19, 2020

We are looking for men and women, over 18 years of age, who experience Eosinophilic Esophagitis (EOE) to participate in a clinical research study. This study will evaluate the safety and effectiveness of an investigational medication in reducing high levels of eosinophils and improving symptoms in people with EOE. There is no cost to participate in this study. Qualified participants will receive either the investigational medication or placebo, lab tests,

and study-related medical care at no cost. You will also be eligible for compensation to cover the cost of your time and travel. Your participation may help evaluate a potential treatment for this disease. To learn more about this study, or to see if you qualify to participate, please contact:
